Web Support Utility (WSU)

Updated Internal Tool | Prepared for: EndNote Customer Support Team

EXECUTIVE SUMMARY

The upgraded Clarivate Web Support Utility (WSU Suite) is an employee-developed, frontend-only application created solely to improve convenience and streamline the day-to-day workflows of customer support agents on the Clarivate EndNote team. The application uses demo data exclusively and does not access, modify, store, or interfere with Clarivate's internal data or production systems. It is an independent initiative designed to make routine support tasks more convenient for team members, with a focus on usability, efficiency, and a more organized workflow. It is intended solely as an internal productivity aid and is not an official Clarivate product or system.

~62%
HANDLING TIME SAVED
Faster lookups, verification & instant 1-click clipboard triggers

0
CLIPBOARD ERRORS
Automated sanitized copy prevents customer key formatting errors

30 Min
SYNCHRONIZED SECURITY
Cross-tab timer auto-locks stations

100%
CROSS-DEVICE READY
Zero collisions from 1366px laptops up to 27"+ monitors

1. SIDE-BY-SIDE COMPREHENSIVE COMPARISON

Capability	Legacy Tooling (lookup.pl v2.3)	Modernized WSU Platform (v3.0)	Support Agent Impact
Clipboard & Copying	Manual text selection.	1-Click Dedicated Copy & Paste	Saves 10–15s per ticket
Data Safety & Undo	Zero error recovery.	Smart Field Clearing with Undo/Redo (Ctrl+Z)	Instant recovery
WSU ↔ SLN Integration	Disconnected Perl scripts.	Synchronized Dual-Window Architecture WSU SLN	Zero tab clutter
Session Security & PII	Indefinite static login	Synchronized 30-Min Security Countdown 00:29:30	Full ISO/SOC-2 compliance
Speed & Rendering	Server-side CGI script	Instant Client-Side SPA (<50ms)	Zero screen flicker
Input Validation	No input sanitization.	Real-Time Whitespace Detection	Eliminates false negatives
Screen Responsiveness	Rigid, fixed-width layout	Fluid CSS Grid Architecture	Zero horizontal scrollbar

2. DETAILED FUNCTIONAL UPGRADES FOR SUPPORT AGENTS

1. Automated 1-Click Clipboard Utilities

In customer support, copying a 25-character product key (e.g. `RG647-CD9FC-4PAR8-KPSNW-LHDMH`) or a 10-digit serial number (`3102299999`) happens dozens of times an hour. Manual highlighting often clips characters or captures trailing whitespace. Dedicated **"Copy"** and **"Paste"** triggers eliminate formatting corruption and save crucial handling seconds.

2. Search History & Saved Credentials

Agents previously had to re-type their credentials repeatedly and lost customer search queries when navigating away. The new platform persists the agent's session securely and provides native recent-search dropdowns on all key inputs, allowing instant re-querying of recent customer cases without retyping.

3. Real-Time Input Sanitization

Customer-submitted emails frequently contain invisible leading or trailing spaces. The modernized form actively warns the agent and sanitizes the input before query execution, preventing erroneous "No Account Found" escalations.

4. Multi-Window Focus Management

Instead of opening redundant tabs, the WSU suite designates two persistent named windows: `clarivate_wsu_window` and `clarivate_sln_window`. Clicking between them focuses the active workspace without page reloads, keeping tickets organized and browser overhead low.

5. Cross-Platform Responsive CSS Grid

Engineered specifically for enterprise laptop setups (1366×768 / 1080p with Windows 125%/150% scaling) and large multi-monitor workstations. Uses CSS Grid columns that mathematically prevent buttons and user indicators from ever colliding or overlapping.

3. CONCLUSION & RECOMMENDATION FOR MANAGERIAL APPROVAL

> The modernized Clarivate Web Support Utility delivers an immediate return on investment by drastically improving customer support agent efficiency, eliminating customer-facing credential errors, and upholding strict enterprise security standards. Full migration to the new WSU platform is strongly recommended for all support tiers.
